

A photograph of two children, a boy and a girl, playing in a splashpad. The boy is on the left, shirtless and wearing swim trunks, running towards the camera. The girl is on the right, wearing a black and white patterned swimsuit, also running. They are both smiling and splashing water. In the background, there is a yellow and green splashpad structure with water spraying from it. The image is overlaid with a large blue triangle on the left side.

# Starting a Splashpad Project

ABC has worked with many communities and organizations to design and build splashpads to suit the specific needs of each customer. To begin a discussion about your splashpad project, a site evaluation is extremely beneficial. The more information we have about your project, the more accurate our assessment will be.

- ▶ Where is the site located?
- ▶ How big is the site?
- ▶ Is there power to the site?
- ▶ Where will water be coming from?
- ▶ Have you considered what you will do with the water that drains from the splashpad?
- ▶ What is your budget?
- ▶ What is your timeline?

If you know the answer to all of these questions, great! If you only know the answers to a few, that's okay too. We can help you find the information you need to make an informed decision.

## ABC Splashpad Advantage

In addition to offering our customers the best quality aquatic play products in the industry, there are several other advantages to doing business with ABC Recreation. Here are just a few.

- ABC has installed more than 500 splashpads throughout Ontario and Atlantic Canada. Our Canadian supplier, Vortex Aquatic Structures, has over 7,000 installations worldwide.
- ABC prides itself in offering the highest level of customer service and customer satisfaction. We're not happy with the finished product until you are.
- Free consultation and design services.
- Highly experienced sales/consulting team.
- Dedicated inside sales/support team.
- Our certified installers and maintenance team provide exceptional service. We can develop a service plan to suit your needs if you don't have the staff to maintain your site.

# Water Play Solutions

## Splashpad®

A dynamic, zero-depth aquatic play area that provides endless hours of fun for the entire family. Splashpad® combines the sensations of different water movements—flowing, misting, and jetting—with over 250 diverse features for an unequaled aquatic play adventure.

## Water Journey™

Inspired by nature's flowing streams, Water Journey™ is a collection of four events providing different play experiences. Water Journey™ experiences take the youngest water play fans on journeys of discovery through playscapes of the imagination, where the water flows gently with multiple elements to move, touch and manipulate.

## Poolplay™ & Elevations™

Elements can enhance your pool or lazy river to provide an engaging and fun environment for all ages. Elevations™ add an extra dimension to pools to offer multi-level adventure in a stimulating environment.

OF  
FUN

## Spraypoint®

A low flow solution that utilizes light mists and small directional water streams. This reduced and controlled water dispersion means you can introduce water play in almost any environment.

## Waterslides

Whether you are designing a full-fledged waterpark or the tiniest toddler spray play area, waterslides will always command attention and exert their magnetic pull on kids of all ages. That's what makes them such amazing additions to any facility, indoors or out.

# Water Management Solutions

Water management is a vital component to the success of any splashpad project. With options for any size splashpad, Vortex water management solutions are specifically engineered for your project. Vortex provides a range of sustainable water management solutions with the best operating efficiency and the highest standards of water quality in the industry. Vortex water management solutions meet and exceed all regional and environmental standards and regulations.

## Recirculation

Recirculation is a closed circuit system that recycles and disinfects the water to and from the play area through the advanced Water Quality Management System (WQMS).

## Repurpose

Repurposing systems are sustainable solutions that are designed to integrate with the overall project scope and needs by reusing the Splashpad® or Spraypoint® effluent water for surface or sub-surface irrigation. These systems are simple to operate and require minimal maintenance.

## Flow-Through

Flow-through systems are easy to operate, low maintenance and eco-friendly solutions to manage water use for Splashpad® or Spraypoint®. These systems use potable water that goes through the play area. Effluent water is then returned to the municipal stormwater or wastewater system, or percolated back to the water table.

## Maestro • Intelligent Water Control

Maestro is a user-friendly and site serviceable controller enabling full control of multiple aquatic play and display solutions with the added benefit of optional remote monitoring to create unique aquatic play experiences.
